DETAILED ACTION

Response to Amendment

1. The following office action is responsive to the action received on 9/5/2007.

Allowable Subject Matter

2. Claims 1-16, and 18-22 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The claimed invention distinguished over the prior art of record through recitation of identifying extraneous feature pixels and excluding them from image data without modifying the non-extraneous pixels. The modified image data can then be processed using standard edge location tools that do not need to be altered to accommodate the extraneous image data. The primary advantage to this invention is the shifting of steps to deal with extraneous pixels to a pre-processing step that allows subsequent edge locating operations to occur without requiring additional specialization to the edge-locating tool.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. "DULLRAZOR®: A Software Approach to Hair Removal From Images" by Tim Lee et al. does teach removing foreground objects from images to allow analysis of the underlying structure. The technique as taught does call for filtering all pixels of the image and not just extraneous pixels.
